

## **Essential components required in project proposals for 2001-2002 cycle**

### **Fulfill “Model Project” criteria,**

1. Respond to a real need of the country
2. Produce significant economic or social impact through the end-user
3. Reflect the distinct advantages of nuclear technology over other approaches
4. Attract strong government commitment

### **Identify the nature of programme**

Priority areas,

- Mandated areas of the Agency
- Areas covering national programmes enjoying strong financial support of government

Proposals should identify objectives, output, impact, success criteria, milestones, end-user and strategy for end-user involvement in the programme and also highlight the following,

- ❖ What ongoing programmes exists in the region / country in this sector?
- ❖ How can this project supplement this programme?
- ❖ Can this project help government to recognize an important need and change its priority towards this area?
- ❖ Is there potential to attract donors like UNDP / World Bank / FAO operating in the region / country?
