

RAS6093 Strengthening Capacity to Manage Non-Communicable Diseases Using Imaging Modalities in Radiology and Nuclear Medicine (RCA)

The mission of RAS6093 is to enhance regional capacity of diagnosis and treatment of Non-communicable Diseases(NCDs) in adult and pediatric patients, using various imaging modalities of nuclear medicine and radiology. The year 2019 was the first year of the 4-year project. The first Project Coordination Meeting of RAS6093 was held in Korea, 22 to 26 April 2019. During the meeting, all NPCs agreed to hold 5 regional training courses, 12 expert missions and develop E-learning module in the next 4 years. To facilitate the development of the E-learning modules, one Expert Mission was scheduled to be held in IAEA Headquarters in Vienna, Austria involving the LCC, TO and IT expert from the Agency to determine the Technical Specifications for the modules, but due to some reasons it was postponed to 2020. Also, a Regional Training Courses on diagnosis and treatment of oncology for radiologist and nuclear medicine physicians from 22 countries was opened for 25 attendees from 22 countries in Hanoi, Vietnam, July 22-26, 2019.
