### Participation in RCA Projects

Dear Mr. Mahendra Prinath Dias,

I refer to the IAEA 2009-2011 Technical Cooperation Programme and would like to convey AECS keen interest to participate in two of the Regional Cooperative Agreement (RAC) projects, namely: **RAS/8/109**: Supporting Radiation Processing of Polymeric Materials for Agricultural Application and Environmental Remediation and **RAS/6/059**: Quality Assurance Team for Radiation Oncology (QUATRO) Training in South-East Asia.

Participation in these two project would allow our country to share experience and knowledge with other countries in the region, and would also promote our research, scientific and applied capacities, especially in the fields of:

- Preparation of super-absorbent hydrogels for use in agricultur
- Preparation of functionalized hydrogel for selective absorption of heavy metals
- Improving the quality of radiotherapy services in Nuclear Medicine Centres
- Increasing the general level of awareness of QA

Before writing formally to the Director for Asia & the Pacific Division, I shall highly appreciate your advice as how to proceed with this request to ensure our timely participation.

Thanking you very much for your cooperation.

Prof. I. Othman  
Director General
