PART 2 Approved RRU list and Information of organization/facilities in your GP

A Regional Resource Unit (RRU) is an organisation or a part of an organization in one GP that provides services or support to other GPs to assist their implementation of a specific RCA project. The RRU concept was introduced into the RCA Programme by the GPs as a mechanism for providing GPs that do not have the necessary facilities to implement the objectives of its National Workplan within the RCA project; Increasing Technical Cooperation among Developing Countries (TCDC); Achieving self-reliance; and, Enhancing their ownership of the Programme.

It was also seen as a mechanism for recognising the successful outcomes from national and international investments that have been made to establish and improve nuclear science and technology, and which have resulted in some GPs achieving a high level of knowledge, training, expertise and capabilities in the application of nuclear science and technology.

By their nature, RRUs will contain well-established laboratory facilities relevant to the project activities, will also have a well-established expert group, and are able to provide technical support to an RCA project. Government Parties are encouraged to volunteer such appropriately qualified units to be RRUs.

The RRUs operate at the project level and provide additional value to the project through extending the implementation of project activities at little or no extra cost to the project budget. In offering to undertake the role of an RRU, an indication is made by the GP that they could provide the project with specified resources for use by other GPs participating in that project.

The role of the RRU is defined as part of the project design and is only committed to providing support in the agreed project area. The RRU ceases its operation once the project has been concluded and thus ensures that the commitment is defined, as part of the project design process, and is not open-ended.

Identified and nominated the potential RRUs for the project by LCCs in consultation with the NPCs were assessed and approved by the RCA FP, PAC Chair, and TO.
